An Integrated Compendium of Twenty One Encyclopedias

**e - Book Academic Collections**

Human society and economy in interaction with nature.

This is the world's largest online publication, at [www.eolss.net](http://www.eolss.net), dedicated to the health, maintenance, and future of the web of life on planet Earth, focusing on the complex connections among all the myriad aspects from natural and social sciences through water, energy, land, food, agriculture, environment, biodiversity, health, education, culture, engineering and technology, management, development, and environmental security, carrying knowledge for our times.

**"EOLSS has the goal to provide a firm knowledge base for future activities to prolong the lifetime of the human race in a hospitable environment"**

Richard R. Ernst, Nobel Laureate in Chemistry

**EOLSS**

## A Sample of Opinions on the UNESCO-EOLSS project

*“Scientific curiosity and technological endeavors are deeply rooted aspects of human nature. They are responsible for the development of human society and welfare. But they are also responsible for much of the environmental problems we are facing today. Solutions for these shortcomings are inconceivable without full scientific and technological support. EOLSS has the goal to provide a firm knowledge base for future activities to prolong the lifetime of the human race in a hospitable environment.”* **Richard R. Ernst, Nobel Laureate- Chemistry**

*“The EOLSS is not only appropriate, but it is imaginative and, to my knowledge, unique. Much of what we can write about science, about energy, about our far-ranging knowledge base, can indeed be found in major encyclopedias, but as I understand your vision, never as a central theme; the theme of humanity, embedded in nature and constrained to find ways of maintaining a relationship with nature based upon understanding and respect.”* **Leon M. Lederman, Nobel Laureate in Physics**

*“The population of our planet and its development over the ages sets the scene for considering all global problems and it is reasonable to begin their discussion with population growth. ... Thus we are dealing with an interdisciplinary problem in an attempt to describe the total human experience, right from its very beginning. But without this perspective of time it is not possible to objectively assess what is happening today and provide an objective view of the present state of development, the challenge now facing humanity.”* **S.P. Kapitza, UNESCO Kalinga Prize Winner**

*“Pursuit of knowledge and truth supersedes present considerations of what nature, life or the world are or should be, for our own vision can only be a narrow one. Ethical evaluation and rules of justice have changed and will change over time and will have to adapt. Law is made for man, not man for law. If it does not fit any more, change it.... Some think that it is being arrogant to try to modify nature; arrogance is to claim that we are perfect as we are! With all the caution that must be exercised and despite the risks that will be encountered, carefully pondering each step, mankind must and will continue along its path, for we have no right to switch off the lights of the future.... We have to walk the path from the tree of knowledge to the control of destiny.”* **Jean-Marie Lehn, Nobel Laureate in Chemistry**

*“Ecotechnology involving appropriate blends of traditional technologies and the ecological prudence of the past with frontier technologies such as biotechnology, information technology, space technology, new materials, renewable energy technology and management technology, can help us to promote global sustainable development involving harmony between humankind and nature on the one hand and tolerance and love of diversity and pluralism in human societies on the other. We need shifts in technology and public policy. This is a challenging task to which the Encyclopedia of Life Support Systems should address itself.”* **M.S. Swaminathan, First World Food Prize winner**

*“EOLSS is concerned with the Life Support Systems... Each of these systems is a very complex one. ...we have to think of all these “systems” as closely related “subsystems” of the Planet Earth System. ...Rational decisions will be more and more possible to envision if one will be able to couple the physical modeling to economic and financial models and to human factors...”* **J.L. Lions, Japan Prize winner in Applied Mathematics**

*“In the coming decades, the need for working together, across countries, is essential. We need to bring 3 billion poor into society and make it possible for them to lead healthy lives, to get the health interventions that we all take as something as self-evident. It can be done. It is within reach. We need to invest in the future. We need to invest in the health of all people worldwide.”* **Gro Harlem Brundtland, Director General, WHO**, in an interview with Patricia Morales

*“We must learn to live at one with nature. Nature does not bear grudges, but it must not be brought to the point where it can no longer sustain human society and the continuance of humankind on Earth. I believe that one of the most important things is the shaping of a new value system, because nature can live without us, but we cannot live without nature. Instead of a hedonic approach, we should promote an approach that reasonably limits consumerism and which promotes the virtue of enoughness. If we insist on consumerism as the new utopia, nature will reject such a system, as surely as cultural diversity rejected the totalitarian system. Our generation has to face a difficult challenge, but as recent history has proven, walls of difficulty, like the Berlin Wall, can fall.”* **Mikhail Gorbachev, Nobel Laureate in Peace**, in an interview with Patricia Morales

*“We live in an increasingly interdependent world. As a result, we must cooperate together across all boundaries of nation, culture, faith, and race, and at all levels—locally, nationally, regionally, and globally— if we are to achieve our basic environmental, economic and social goals. Furthermore, if we are to make wise choices and to cooperate together effectively, we urgently need a shared vision of fundamental ethical values to guide us. In other words, the development of global ethics is essential. Our very survival as a species is in doubt if we cannot clarify our ethics and develop common values around such basic issues as environmental protection, justice, human rights, cultural diversity, economic equity, eradication of poverty, and peace.”* **Steven C. Rockefeller, Earth Charter Commissioner**, in an interview with Patricia Morales

## EOLSS e-book Academic Collections

UNESCO-Encyclopedia Life Support Systems (EOLSS) has been developed under the auspices of the United Nations Educational, Scientific and Cultural Organization (UNESCO). It is regarded as the world's largest comprehensive professional publication carrying state-of-the-art, high quality, peer reviewed, thematically organized archival content in many traditional disciplines, and interdisciplinary subjects including the coverage of transdisciplinary pathways. The contributions are from thousands of scholars from over 100 countries and edited by more than 350 subject experts. It also includes up-to-date coverage of various aspects of sustainable development that are relevant to the current state of the world. UNESCO-EOLSS is an integrated compendium of twenty one component encyclopedias:

1. EARTH AND ATMOSPHERIC SCIENCES
2. MATHEMATICAL SCIENCES
3. BIOLOGICAL, PHYSIOLOGICAL AND HEALTH SCIENCES
4. BIOTECHNOLOGY
5. TROPICAL BIOLOGY AND CONSERVATION MANAGEMENT
6. SOCIAL SCIENCES AND HUMANITIES
7. PHYSICAL SCIENCES, ENGINEERING AND TECHNOLOGY RESOURCES
8. CONTROL SYSTEMS, ROBOTICS AND AUTOMATION
9. CHEMICAL SCIENCES ENGINEERING AND TECHNOLOGY RESOURCES
10. WATER SCIENCES, ENGINEERING AND TECHNOLOGY RESOURCES
11. DESALINATION AND WATER RESOURCES (DESWARE)
12. ENERGY SCIENCES, ENGINEERING AND TECHNOLOGY RESOURCES
13. ENVIRONMENTAL AND ECOLOGICAL SCIENCES, ENGINEERING AND TECHNOLOGY RESOURCES
14. FOOD AND AGRICULTURAL SCIENCES, ENGINEERING AND TECHNOLOGY RESOURCES
15. HUMAN RESOURCES POLICY, DEVELOPMENT AND MANAGEMENT
16. NATURAL RESOURCES POLICY AND MANAGEMENT
17. DEVELOPMENT AND ECONOMIC SCIENCES
18. INSTITUTIONAL AND INFRASTRUCTURAL RESOURCES
19. TECHNOLOGY, INFORMATION AND SYSTEM MANAGEMENT RESOURCES
20. LAND USE, LAND COVER AND SOIL SCIENCES
21. AREA STUDIES (AFRICA, BRAZIL, CANADA AND USA, CHINA, EUROPE, JAPAN, RUSSIA)

It is a valuable resource for education, research and policy making in the 21<sup>st</sup> century. It is targeted at a wide audience of students, researchers, educators at the university level, and policy makers to be made available through university

libraries, departmental libraries, public libraries, govt. libraries, company libraries etc.

It is available in the form of e-Books in PDF format, so the only software needed is Adobe® Reader, which is available free of charge at the Adobe Web site: [www.adobe.com](http://www.adobe.com). To browse the content of this collection follow the link: <http://www.eolss.net/ebooklib/home.aspx> to see the 21 component encyclopedias covering various subject categories. Each of these in turn is linked to the underlying themes and the titles of individual e-books.

In view of the current global trend of libraries moving away from shared collection concept, this offer of EOLSS e-book collections at a very attractive and affordable cost is to enable purchase by an individual institution/library for full and independent ownership for perpetual simultaneous user access within its Full Time Enrollment (FTE) in a buyer friendly scheme. There are considerable standard discounts and additional discounts based on country ranking according to United Nations Human Development Index (UN-HDI) and there is also a facility to make payments in annual installments if desired.

Out of the 21 Subject Sets available a buyer can 'Pick and Choose' the desired title(s) which are listed in the catalogue and also on the spreadsheet at <https://www.eolss.net/eBooks-Catalogue.xls>

**EOLSS e-book Academic Collections:** e-book(s) can be selected by title(s) from component encyclopedia(s) for ownership for unlimited usage/access by a single institution/department/ library within its FTE.

**The list price for a single volume is US\$90. Discount rates for sets are as follows:**

- 1-100 : **10%** on the total price.
- 101-200: **15%** on the total price.
- 201-300: **20%** on the total price.
- 301-400: **25%** on the total price.
- 401-500: **30%** on the total price.
- 501 and above: **35%** on the total price.
- Additional discount based on UN-HDI which **will be up to 5% on the total price**

**In fact, the whole EOLSS e-book academic collection is highly recommended as the best option for Institutions and Libraries concerned with education and research in a multitude of disciplines and interdisciplinary areas. Users can search and access any volume of their interest from their personal desks.**

In order to facilitate easy payment under annual budgetary constrains, buyers can request for payment in annual installments, each not less than \$2500.

\*\* Forthcoming e-Book

**The Sciences in Support of Sustainable Development:** Sustainability Science is the study of sustainable development from a multiple-scale perspective, in that it is necessary to consider issues at a micro-level as well as at a macro-level. It is the study of dynamic interactions between nature and human society.

*(A life support system is any natural or human engineered (constructed) system that furthers the life of the biosphere in a sustainable fashion. The fundamental attribute of life support systems is that together they provide all of the sustainable needs required for continuance of life.)*
